SUMMARY

Full-stack developer who has designed, built, and deployed two production-grade MERN applications end-to-end — from JWT auth and payment integration to cloud deployment. Strong CS fundamentals (DSA, OOP, DBMS, OS) backed by 365+ LeetCode problems solved. Pursuing an Integrated M.Sc. in Mathematics and Computing at BIT Mesra (CGPA 8.34/10). Seeking an SDE role to ship reliable, scalable products.

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript, SQL

Web & Backend: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, Axios, HTML5, CSS3, Tailwind CSS, Bootstrap

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems

Tools & Cloud: Git, GitHub, MongoDB Atlas, Render, Cloudinary, Razorpay API

Machine Learning: Supervised Learning, Regression, Classification, Scikit-learn

PROJECTS

Enterprise MERN E-Commerce Platform [GitHub](#) | [Link](#)

React.js · Node.js · Express.js · MongoDB Atlas · Tailwind CSS · JWT · Razorpay · Cloudinary

- Architected a full-stack e-commerce platform end-to-end, shipping role-based (Admin/Customer) authentication with JWT + refresh-token rotation to secure user sessions.
- Built the core commerce engine — product catalog, categories, cart, wishlist, coupons, and order management with MongoDB Atlas.
- Integrated Razorpay for online payments (Test Mode) and Cloudinary for image storage, uploads, and SMTP email service for password reset functionality.
- Designed an admin analytics dashboard (order analytics dashboard, inventory, customer/order management) that reduced manual reporting time.
- Delivered secure RESTful endpoints in Express.js with role-based authorization, covering full CRUD across catalog, cart, and order flows.
- Deployed frontend and backend independently on Render with MongoDB Atlas, configuring production env vars and CORS for a zero-downtime release.

Airbnb Clone (Full-Stack MVC) [GitHub](#) | [Link](#)

Node.js · Express.js · MongoDB Atlas · EJS · Bootstrap · Passport.js · Cloudinary · Leaflet · OpenStreetMap

- Engineered a full-stack property rental platform using the MVC architecture with Node.js, Express.js, MongoDB Atlas, and EJS, enabling users to browse, create, and manage property listings
- Implemented secure user authentication and authorization using passport.js with session-based login, encrypted password storage, and role-based access control.
- Built complete CRUD functionality for property listings and reviews, ensuring only listing owners and review authors can modify or delete their content.
- Integrated Cloudinary for cloud-based image upload, storage, and optimized delivery of listing images.
- Embedded leaflet with OpenStreetMap to display interactive maps and property locations, improving location visualization and user navigation.
- Designed a responsive user interface using Bootstrap, providing a consistent experience across desktop and mobile devices.

EDUCATION

Birla Institute of Technology, Mesra — Integrated M.Sc. (Mathematics and Computing)

Nov 2022 – Present

CGPA: 8.34/10 | Ranchi, Jharkhand

Delhi Public School (DPS), Bokaro Steel City

2019 – 2021

Class XII — 93%

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification — DeepLearning.AI & Stanford University (Coursera), Jun 2024 [Link](#)
- Advanced Learning Algorithms — DeepLearning.AI & Stanford University (Coursera), Oct 2024 [Link](#)

ACHIEVEMENTS

- Solved 365+ Data Structures & Algorithms problems on LeetCode.
- Earned the LeetCode 100 Days Badge (2025) for sustained, daily problem-solving consistency.
